

Scale & grout haze remover

- ✓ A powerful ready-to-use facade cleaner
- ✓ Developed for the removal of white lime efflorescence (calcium carbonate) and cement film on masonry
- ✓ Free from hydrochloric acid and phosphoric acid

EFFECTIVE, LIGHT AND EASY TO USE

1

The application temperature should be at least 2°C.

2

Protect materials that are not to be treated with a protective layer.

3

Wear liquid-tight gloves and protective glasses.

4

Apply the product on a test surface to check for any harmful effect on the substrate.

5

Apply the product undiluted with a block brush until no more reaction can be observed.

6

After treatment, rinse the facade with sufficient cold water.
